Maple Checkpoint

Checkpoint for Farmer

Checkpoint is designed to ensure security and minimize theft.

Checkpoint integrates seamlessly within the Thera ecosystem. All bookings will be booked in Maple LMC and will be sent to a

Checkpoint app that provides real-time feedback on load statuses.

Why Choose Checkpoint

- > Reduce risk of theft.
- > Provides real-time updates on load statuses.
- > Provides reports on all loads sent to Checkpoint.
- > Option to manage multiple farms.

Our Services

Contracts

Contracts that are generated on Boabab CTRM can be sent to a farmer to sign and accept.

Loading

Bookings created in Maple LMC are sent to a Checkpoint. Farmer can then confirm loading info and update status to loaded. Bookings are linked to a contract that farmer has accepted.

Reports

Report can be generated on Checkpoint to see all loads that has been loaded at Farm.

Checkpoint for Farmer with silo

Checkpoint is designed to ensure security and minimize theft.

Checkpoint integrates seamlessly within the Thera ecosystem. All bookings will be booked in Maple LMC and will be sent to a Checkpoint app that provides real-time feedback on load statuses.

Why Choose Checkpoint

- > Reduce risk of theft.
- > Provides real-time updates on load statuses.
- > Provides reports on all loads sent to Checkpoint.
- > Option to manage multiple farms.

Our Services

Contracts

Contracts that are generated on Boabab CTRM can be sent to a farmer to sign and accept.

Loading and offloading

Bookings created in Maple LMC are sent to a Checkpoint. Farmer can then confirm loading or offloading info and updated status to loaded or offloaded. Bookings are linked to a contract that farmer has accepted. If there is a weighbridge available weights and ticket number can be included.

Reports

Report can be generated on Checkpoint to see all loads that has been loaded at Farm.

Checkpoint for Silo or Mill

Checkpoint is designed to ensure security and minimize theft.

Checkpoint integrates seamlessly within the Thera ecosystem. All bookings will be booked in Maple LMC and will be sent to a Checkpoint app that provides real-time feedback on load statuses.

Why Choose Checkpoint

- > Reduce risk of theft.
- > Provides real-time updates on load statuses.
- > Provides reports on all loads sent to Checkpoint.
- > Option to manage multiple silos/mills.

Our Services

Contracts

Contracts that are generated on Boabab CTRM can be sent to a silo/mill to sign and accept.

Loading and offloading

Bookings created in Maple LMC are sent to a Checkpoint. Silo/mill can confirm check-in for loading or offloading info and updated status to loaded or offloaded. Bookings are linked to a contract that farmer has accepted. If there is a weighbridge available weights and ticket number can be included.

Reports

Report can be generated on Checkpoint to see all loads that has been loaded at Farm.
